Introduction

This report is based on the study monitoring survey conducted by ZUMA for the ISSP in 2001 and 2002 on the 2000 Environment module.

Twenty-six member countries archived the 2000 Environment module and returned the monitoring questionnaire. Details of the individual answers members provided are presented in the summary chart which follows here. The latest version of the study monitoring questionnaire is appended.

We have done our best to summarise the answers we received and to check the information with members. Members were given the opportunity to make corrections before the report was added as a supplement to the Archive codebook for the 2000 study and made available on the Archive web site.

Summary of the findings

The questionnaire (see pages 1–2 of the Findings Chart)

From 1999 on, the Study Monitoring Questionnaire (SMQ) asks whether members checked or evaluated their translations. Of the twenty-two countries that produced translations, the United States did not check or evaluate the translation and Austria did not indicate whether they did. Sixteen countries did not pre-test the translated questionnaire (Canada, Chile, Czech Republic, Denmark, Finland, Germany, Israel, Japan, Latvia, Norway, the Netherlands, Portugal, Russia, Sweden, Switzerland, and Slovenia). The Philippines fielded in five languages, Switzerland in three languages, and Finland, Israel, and Latvia in two languages. Canada and the United States fielded in one other language besides English. Germany, Finland, and Norway were the only members who reported translation problems.

Survey context and question coverage (see pages 2–3 of the Findings Chart)

In 2000, eighteen countries fielded the ISSP module as part of a larger survey. Six members did not include all the core items (Czech Republic, Denmark, Finland, Japan, Latvia, and the Netherlands). Denmark omitted substantive and background variables; Latvia omitted substantive questions, the other members omitted background variables. Questions were usually omitted by mistake. On occasion members stated they cut them to save money.

Sampling (see pages 4–7 of the Findings Chart)

The sampling procedures and details reported for the 2000 module are for the most part similar to those reported in earlier years. Two countries reported using quota procedures at

different stages (the Netherlands and Russia), nine reported using substitution of different kinds.

Finland and Switzerland had a lower age cut-off of 15 years, Japan and the Netherlands had a cut-off of 16 years; all other members had a lower age cut-off of 18 years of age. Five countries reported an upper age cut-off (Denmark and Finland at 74, Norway and Sweden at 79, and Latvia at 85 years).

Fieldwork (see pages 8–12 and 17 of the Findings Chart)

MODES

Five countries combined several modes in fielding, usually as a result of fielding the ISSP module together with another study and administering the background variables for both studies face-to-face and the ISSP as self-completion (Bulgaria, Germany, Northern Ireland, the Netherlands, and Switzerland). Switzerland used both mail and interviewer modes.

Four countries using an interviewer-administered mode had mail components, such as advance and reminder letters (Germany, Northern Ireland, the Netherlands, and Slovenia). Three countries using a mail approach had telephone contacts in the form of prenotifications or reminders (Denmark, Sweden, and Switzerland). In Denmark a few interviews were collected by telephone (the mode variable identifies these), in Switzerland, a fair number of background variables were collected by telephone (a variable identifies these). The Methodology Committee discussed this deviation from ISSP procedures with the Swiss, who have now changed their design.

Seven countries conducted their survey by mail (see table on page 17). Four countries had four mailings, and the other had three mailings. The number of mailings is usually seen as relevant for enhancing response rates, Dillman 2000.

FIELDING DATES

Dates of fielding range from 2000 to 2002:

2000	18 countries
2000-2001	1 country
2001	5 countries
2001-2002	1 country
2000-2002	1 country ¹ .

Japan had the shortest fielding period, with seven days, Mexico had the longest, with eight months.

¹ Switzerland fielded three samples, two from 2000 to 2001 and one in 2002.

In sixteen of twenty countries using interviewer-administered modes, interviewers approached addresses or households at different times of day and at different days of the week; in two countries at different times of day only, and in one country at different days in the week only. Switzerland made no specifications.

Countries differ considerably in the number of required contact attempts. The minimum required number of calls at an address or a household ranges from none (Japan) to fifteen (Switzerland). Seven countries supervised interviews (proportions ranging between 3%-30%), and 17 countries back-checked interviews (proportions ranging between 0.5%-70%).

Information on response and outcome figures (see pages 13–14 of the Findings Chart)

Quota procedures, substitution, and, in some cases, a lack of sufficient detail are the three main obstacles to calculating response rates for some of the ISSP 2000 studies (cf. reasons mentioned in the Park and Jowell report (1997) and expanded in the overview of the 1996-1998 monitoring studies, Harkness, Langfeldt, and Scholz, 2001). Members also differ in their definitions of outcome codes – of what counts as “eligible“, “ineligible“, or “partially completed interviews“, and so forth.

The raw figures for eligible samples and final outcomes indicate, nevertheless, that the range is considerable in the ISSP – from below 30% to over 80% for the module.

Data (see pages 15–16 of the Findings Chart)

The great majority of members employed various measures of coding reliability, for the most part logic or consistency checks and range checks, followed by either individual or automatic corrections or both.

Roughly one half applied subsequent weights or post-stratification to correct for errors of selection or response bias.

Study Monitoring Questionnaire

PLEASE COMPLETE THIS QUESTIONNAIRE USING THE
ENVIRONMENT 2000 ISSP MODULE AS YOUR REFERENCE.

RETURN TO: Janet Harkness, ZUMA, PO Box 12 21 55, D-68072 Mannheim, harkness@zuma-mannheim.de

1a. Please enter the name of your institute and your country:

Institute:

Country:

1b. Please enter the name of the principal investigator and your contact person for questions about the study:

Principal Investigator:

Contact Person:

2a. What kind of institute fielded the module?

An institute principally doing market research

An institute principally doing academic research

An institute doing both market and academic research

Other (please write in details)

2b. Which institute carried out the fielding?

Our ISSP member institute itself

OR

Institute name:

3a. Was the questionnaire fielded ...

only in English

→ Question 10

in English plus other language(s)

→ Question 3b

only in translation

→ Question 3b

3b. Please enter the language(s) the module was fielded in.

Please write in:

3c. Were questionnaires available for each language fielded?

Yes

→ Question 4

No

→ Question 3d

3d. Please give details of how you fielded without a questionnaire for one or more languages.

4. Who carried out the translation(s) for your questionnaires? Please tick all that apply.

A member or members of the research team

A translation bureau

One or more specially trained translators

Other (please write in details)

5. Was the translation checked or evaluated?

Yes → Question 6

No → Question 7

6. How was the translation checked or evaluated?

Group discussion

Expert checked it

Back translation

Other (please write in details)

Please write in:

7. Was the translated questionnaire pre-tested?

Yes

No

8. Were there any questions, sections, words or concepts which caused problems when translating? Please tick all that apply.

No problems → Question 10

Answer scales

Instructions

Whole questions

Words or concepts

Other (please write in details)

Please write in details of problems checked/ticked above:

9. What did you do about any problems?

Please enter details:

10. What data collection methods were used for the module (substantive and background questions)?

Face-to-face

Self-completion (with some interviewer involvement in delivering or collecting)

'Mixed mode': part self-completion, part face-to-face (please write in details)

Other (please write in details)

If 'mixed mode' or other, please write in:

11. Were postal or telephone components used (e.g. advance contacts)?

Yes (please write in details)

No

If postal/telephone components are used, please write in:

12. How was the ISSP module fielded in your country?

As an individual survey (that is, the ISSP module was the whole survey) →Question 14

As part of a larger survey →Question 13

13. What was the approximate position of the Environment module in the larger questionnaire?

Start of questionnaire

Middle of questionnaire

End of questionnaire

14. Were the substantive questions in the Environment module all asked in the prescribed order?

Yes

Yes, apart from omissions

No

15. Were all the core ISSP questions included in your questionnaire (by core we mean all items except those that were optional)?

No – substantive question(s) from Environment module not included →Question 16

No – required background ISSP question(s) not included →Question 16

Yes – all Environment questions and background questions included →Question 17

16. Please write in details of the items and the reasons why questions were not included.

ISSP source questionnaire: question number or description of question:

Reason(s) not included:

17. Was your sample designed to be representative of ...

... only adult citizens of your country?

... adults of any nationality able to complete the questionnaire / interview?

18. Was your sample designed to be representative of ...

... only adults living in private accommodation? → Question 19

... adults living in private and in institutional accommodation
(e.g., residential homes for the elderly, asylum accommodation)?

Please enter details in box below.

Please enter in:

19. What was the lower age cut-off for your sample?

WRITE IN :

20. Was there any upper age cut-off for your sample?

Yes - please write in cut-off

No cut-off

21. Were any groups excluded or under-represented in your sample design, apart from the age cut-offs or citizenship requirements just asked about?

No

Yes (please write in details)

If yes, write in details:

22. What were the different stages in your sampling procedure?

Please write in:

23. How many of the stages were based purely on probability sampling methods that is, with no 'quota controls' employed? -

None

Some

All

24. What probability of selection did every member of the population sampled have?

A known and equal probability

→ Question 26

A known and not equal probability

→ Question 25

An unknown probability of selection

→ Question 25

25. In what way was probability of selection not equal or not known?

Please write in:

26. What was the final number of issued clusters or sampling points?

No clusters / sampling points

WRITE IN NUMBER:

27. What was the sampled unit that emerged from office sampling?

Address →Question 28

Household →Question 28

Named individual →Question 30

Other (please write in details) →Question 28

28. What selection method was used to identify a respondent?

Kish grid →Question 30

Last (or next) birthday →Question 30

Quota →Question 29

Other (please write in details) →Question 30

29. Please describe your quota procedures

Please write in:

30. Was substitution or replacement permitted at any stage of your selection process or during fieldwork?

Yes →Question 31

No →Question 32

31. In what way was substitution or replacement permitted?

Please write in:

32. Did you use any stratification factors when drawing your sample?

Yes

→Question 33

No

→Question 34

33. What stratification factors were used, and at what stage(s) of selection?

Please write in:

34. All in all, what are the known limitations (biases) of your achieved sample?
For example: is there differential coverage of particular groups, either because of sample design or response differences?

Please write in:

35. Please fill in the following details about your issued sample. If some categories do not apply, please complete to the highest level of detail possible and use the 'other' box to give more information.

- Total number of starting or issued names/addresses
- addresses which could not be traced at all
- selected respondents who could not be traced
- addresses established as empty, demolished or containing no private dwellings
- selected respondent too sick/incapacitated to participate
- selected respondent away during survey period
- selected respondent had inadequate understanding of language of survey
- no contact at selected address
- no contact with selected person
- refusal at selected address
- proxy refusal (on behalf of selected respondent)
- personal refusal by selected respondent
- other type of unproductive (please write in full details in the box below)
- full productive interview
- partial productive interview

More information or Other type of unproductive reaction

Please write in:

36. Here we ask for information about interviewer procedures.

a. Were interviewers paid according to performance (for example, according to the number of interviews they obtained)?

Yes

No

b. Which, if any, of these rules governed how an interviewer approached an address/household?

PLEASE TICK THOSE THAT APPLY

Calls/visits must be made at different times of day

Calls/visits must be made on different days of week

Neither of the above

c. Were interviewers required to make a certain number of calls/ visits before they stopped approaching an address or household?

Minimum number of calls/visits required - please write in number

No minimum call requirement

d. Were any interviews supervised (that is, supervisor accompanies interviewer)?

Yes - please write in approximate proportion %

No

e. Were any interviews back-checked (e.g. supervisor checks later whether interview conducted)?

Yes - please write in approximate proportion %

No

37. Please write in the approximate start and end dates of fieldwork.

D D M M Y Y

Start date

End date

38. Were any measures of coding reliability employed?

Yes

No

39. Was keying of the data verified?

Yes - please write in approximate level of verification %

No

Documentation for Environment 2000 surveys (except mail surveys)

40. Were any reliability checks made on derived variables (that is variables constructed on the basis of other variables collected)?

Yes

No

41. Were data checked/edited to ensure that filter instructions were followed correctly?

Yes

No

42. Were data checked/edited for logic or consistency?

Yes

No

43. Were data checked/edited to ensure they fell within permitted ranges?

Yes

No

**If you answered YES for any question from Q38 to Q43, continue with Question 44.
If you answered NO for all questions Q38 to Q43, continue with Question 45.**

44. Were errors corrected individually or automatically (through, for example, a 'forced' edit)?
Please tick all that apply.

Yes - individual correction

Yes - automatic correction

No - not corrected

45. Were the data weighted or post-stratified?

Yes

→ Question 46

No

→ Please read the instruction after Question 46.

46. Please briefly describe the weighting or post-stratification strategy used.

Please write in:

NOW PLEASE RETURN THE QUESTIONNAIRE TO THE ADDRESS ON THE FRONT PAGE

THANK YOU VERY MUCH

- selected respondent too sick/incapacitated to participate	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- selected respondent deceased	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- selected respondent had inadequate understanding of language of survey	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- selected respondent away during survey period	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- refusal by selected respondent	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- refusal by another person	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- implicit refusals (empty envelopes, empty questionnaires returned)	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- other type of unproductive reaction (please write in details in box below)	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- completed returned questionnaires	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- partially completed returned questionnaires	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
- no contact	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Other information or other type of unproductive reaction

Please write in:

35. Were any measures of coding reliability employed?

Yes

No

36. Was keying of the data verified?

Yes - please write in approximate level of verification %

No

37. Were any reliability checks made on derived variables?

Yes

No

38. Were data checked/edited to ensure that filter instructions were followed correctly?

Yes

No

39. Were data checked/edited for logic or consistency?

Yes

No

40. Were data checked/edited to ensure they fell within permitted ranges?

Yes

No

**If you answered YES for any question from Q35 to Q40, continue with Question 41.
If you answered NO for all questions Q35 to Q40, continue with Question 42.**

41. Were errors corrected individually or automatically (through, for example, a 'forced' edit)?
Please tick all that apply.

Yes - individual correction

Yes - automatic correction

No - not corrected

42. Were the data weighted or post-stratified?

Yes → Question 43
No → Please read the instruction after Question 43.

43. Please briefly describe the weighting or post-stratification strategy used.

Please write in:

NOW PLEASE RETURN THE QUESTIONNAIRE TO THE ADDRESS ON THE FRONT PAGE

THANK YOU VERY MUCH
